

Molecular Crystals and Liquid Crystals

ISSN 1542-1406 (Print), 1563-5287 (Online)

Instructions for authors

Initial Submission Guidelines. Manuscripts should be:

- Typed double spaced throughout, including the reference section;
- Prepared in Microsoft Word or WordPerfect;
- Clearly labeled with the lead author's name.

All manuscript elements should be saved in one unified file including:

- the title page;
- 3–6 keywords;
- abstract not more than 100 words;
- shortened version of the title suitable for the running head, not more than 50 character spaces;
- all sections of the body of the paper;
- references;
- tables and figures embedded in the text;
- full contact information (email address, telephone and fax numbers) for all authors.

Each manuscript must be accompanied by a statement that it has not been published elsewhere and that it has not been submitted simultaneously for publication elsewhere. Authors are responsible for obtaining permission to reproduce copyrighted material from other sources and are required to sign an agreement for the transfer of copyright to the publisher. As an author, you are required to secure permission if you want to reproduce any figure, table, or extract from the text of another source. This applies to direct reproduction as well as "derivative reproduction" where you have created a new figure or table which derives substantially from a copyrighted source. All accepted manuscripts, artwork, and photographs become the property of the publisher. Manuscripts will not be processed without a completed and signed copyright form.

A fully completed CIF (Crystallographic Information File) should be deposited with the Cambridge Crystallographic Data Centre (send files as attachments to deposit@ccdc.cam.ac.uk) and the returned deposition number quoted in the experimental section of the manuscript.

Upon Acceptance. Once your manuscript has been accepted for publication you must supply the following:

The accepted manuscript in Word or WordPerfect

Separate source files for all tables and figures

A file containing all table and figure captions.

Illustrations. Illustrations submitted (line drawings, halftones, photos, photomicrographs, etc.) should be clean originals or digital files. Digital files are recommended for highest quality reproduction and should follow these guidelines:

300 dpi or higher

sized to fit on journal page

EPS, TIFF, or PSD format only

submitted as separate files, not embedded in text files

Color Reproduction. Color art will be reproduced in color in the online publication at no additional cost to the author. Color art will print at the publisher's discretion at no additional cost to the author. Please ensure that color figures and images submitted for publication will render clearly in a black & white conversion for print.

Tables and Figures. Tables and figures should not be embedded in the text after manuscript acceptance, but should be included as files. A short descriptive title should appear above each table with a clear legend and any footnotes suitably identified below. All units must be included. Figures should be completely labeled, taking into account necessary size reduction. Captions should be typed, double-spaced, on a separate sheet.

References. References are indicated in the text by consecutive superior arabic numbers enclosed in brackets. For example, the first reference would be [1], the following reference [2], and so on. The full list should be collected and typed at the end of the paper in numerical order. Listed references should be complete in all details, excluding article titles in journals. Authors' initials should follow their names; journal title abbreviations should conform to the style of the American Physical Society. Examples:

Journal : [1] Mann, A. B., Cammarata, R. C., & Nastasi, M. A. (1999). *J. Mater. Res.*, 14 , 2195.

Book : [2] Buchner, H. et al. (1995). *Hydrogen and Other Alternative Fuels for Air and Ground Transportation* , Wiley: Chichester, UK.

Chapter in a Book : [3] Jeffrey, T. et al . (1996). In: *Pulsed Laser Deposition of Thin Film* , Chrisey, D. B. & Hubler, G. K. (Eds.), Chapter 6, Wiley-InterScience: New York, 186.

Complimentary Policy. Authors for whom we receive a valid email address will be provided an opportunity to purchase reprints of individual articles, or copies of the complete print issue. These authors will also be given complimentary access to their final article on Taylor & Francis Online.
